## Have a seat

Toilets can serve as a calling card of sorts, or as a space where you can briefly withdraw from the hustle and bustle of life for a quick break. Everyone has different ideas as to how best to experience toilets. When homes and public spaces are designed, toilets aren't necessarily the highest priority. However, if you use JEE-O's beautifully designed items, upgrading your private mini-break won't take much of an effort.

Naturally, you must prioritise comfort and hygiene when you choose your products and materials. JEE-O's complete series of toilet products is living proof that functionality and design can and do go hand in hand, with the new JEE-O base serving as a lovely finishing touch.

Toilets tend to be small spaces, so it's vital that space be used smartly. JEE-O's base can be easily combined with the cool, small flow or amsterdam basin, and comes in either white or black.

We offer three beautiful combined sets, where you get to choose for yourself whether you want the cut-out for the drain pipe on the left or right of the base, or rather at the centre. As a result, this base will fit into any toilet, with the small basin installed wherever it makes most sense, space-wise. If you want, you can order a base that leaves enough space for a soap dispenser. Furthermore, each type of base comes with an invisible towel bar at the bottom where a small towel can be placed.

Since the slimline cold water taps (which can be installed directly on the wall if you want), basin plug and basin siphon come in several different versions, you will be able to style your toilet as you see fit. For more inspiring images and ideas on how to combine our products, be sure to check out our website at [www.jee-o.com](http://www.jee-o.com).
