Cone freestanding bath mixer with Jasmine bath from the DADO design collection

OSIRIS HERTMAN, DESIGNER OF JEE-O CONE SERIES

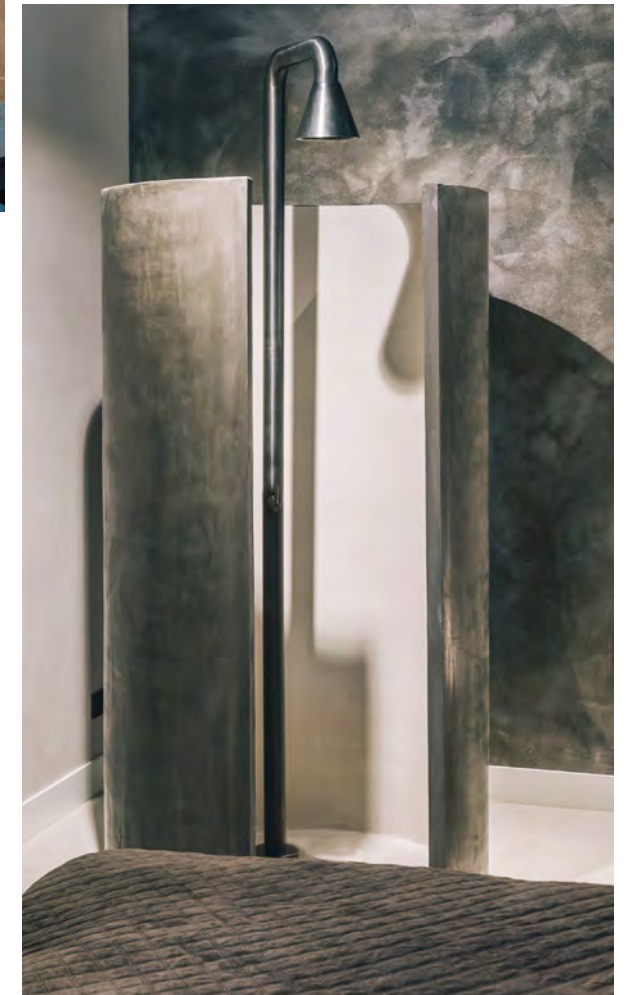

The cone series is the perfect balance of playfulness and boldness. From a distance, the design seems elementary, but a closer look reveals unusual details and an elegant finish, expressing the craftsmanship Osiris always seeks in his designs. He believes that, while we should be careful in our use of water, we can still enjoy it. Our bathrooms are gradually becoming places of relaxation, often with seats, music, plants, and if there is enough space, saunas, fireplaces and pretty views. They are now spaces to be enjoyed and to recharge so we can deal with a world that is much busier and more demanding than ever before. The conical shape, the basis for this series, can be found in the smallest details. The handles are modelled on safe doors - after all, water is a precious commodity. At the same time, the designs bring allure to your home, a notion that is held dear by JEE-O too. To JEE-O, the design is paramount, the essence of our product. A radical look reveals cones in all the components.

Osiris Hertman seamlessly integrated the cone collection from JEE-O, a collection of his own design.

This range of freestanding outdoor and indoor showers, taps and amazing accessories not only exemplifies craftsmanship but also represents an enduring symbol of timeless sophistication. It's the ideal complement for blending historic charm with contemporary flair. The showers aesthetics, coupled with its exceptional quality and functionality, make it an ideal choice for hotels and various projects where wellness plays a pivotal role in defining the ambiance of a space.

OSIRIS HERTMAN

Osiris Hertman graduated from the Design Academy Eindhoven, having studied under Lidewij Edelkoort. He started his career working for Ulf Moritz and later for Marcel Wanders. His background in product design is reflected in his passion for customizing each project.

Osiris is an all-round designer who's been pushing the boundaries of design since he opened his studio in 1997, after graduating from the Design Academy Eindhoven. Over the last 15 years Osiris has proven himself to be an all-round designer. Started as a furniture designer, soon came interiors, home accessories and even hand crafted silver jewelry for the renowned lifestyle brand Buddha to Buddha.

His background in product design is reflected in each of his interiors by the great amount of detailing and customized objects. Osiris travels all across the world to find unique and beautiful materials.

The major part of all design pieces are made by hand and encapsulate his ideology for elegance, beauty and craftsmanship. Often together with those same craftsmen he creates the customized furniture that makes an Osiris Hertman interior unique.

This also applies to the cone serie. Take a closer look; the details and elegant finish express the craftsmanship Osiris always seeks in his designs.

JEE-O AND LAMMERT MOERMAN

Lammert Moerman, concept designer and creative brain behind the brand JEE-O, closely collaborates with top designer Osiris Hertman on the cone collection. He assembled a skilled team to bring Osiris Hertman's design vision to life, achieving the flawless cone shape and delivering unparalleled high-end quality. The result is a collection where craftsmanship, innovation, and bold design meet seamlessly. A look that speaks for itself, JEE-O represents a personal, conscious choice in the modern interpretation of free time. Pure aesthetic enjoyment... let us energise you! JEE-O is refreshing and ambitious, exclusive and extrovert, tough and bold.

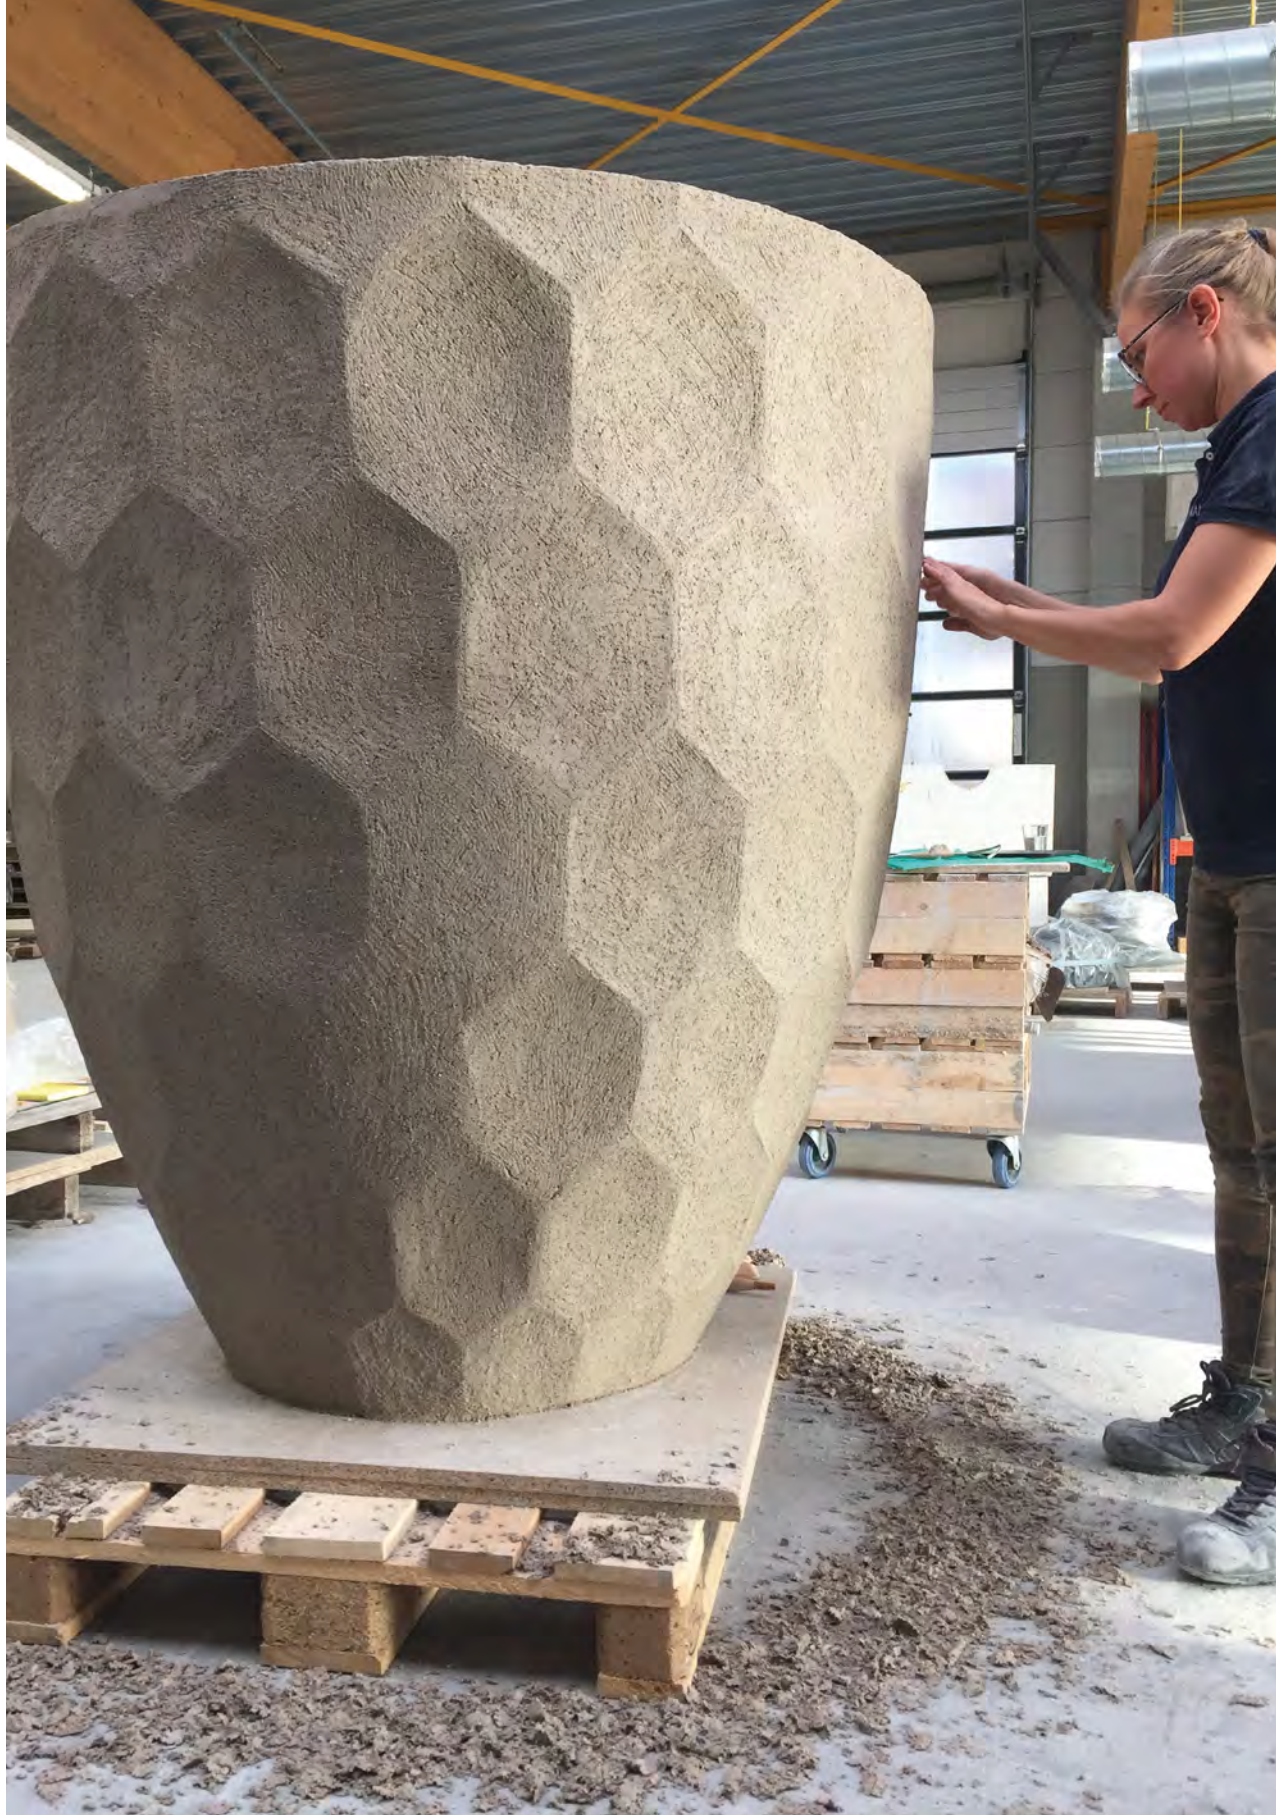

The Cone is truly a masterpiece. This series includes faucets and showerheads, and the design is simply unlike anything you'll find elsewhere. That's exactly what JEE-O is all about: daring to be bold and not being afraid to stand out.

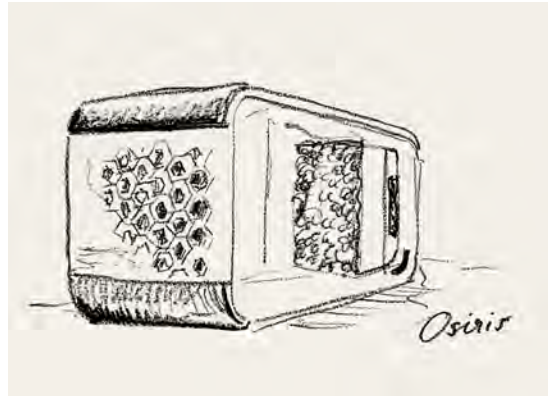

'Don't be afraid
to stand out.'

Designer Osiris Hertman works with the best local artisans in Bali, Portugal, Belgium and Italy

‘Creating
a fairytale
moonscape.’

PRESENTING DUMBELSS

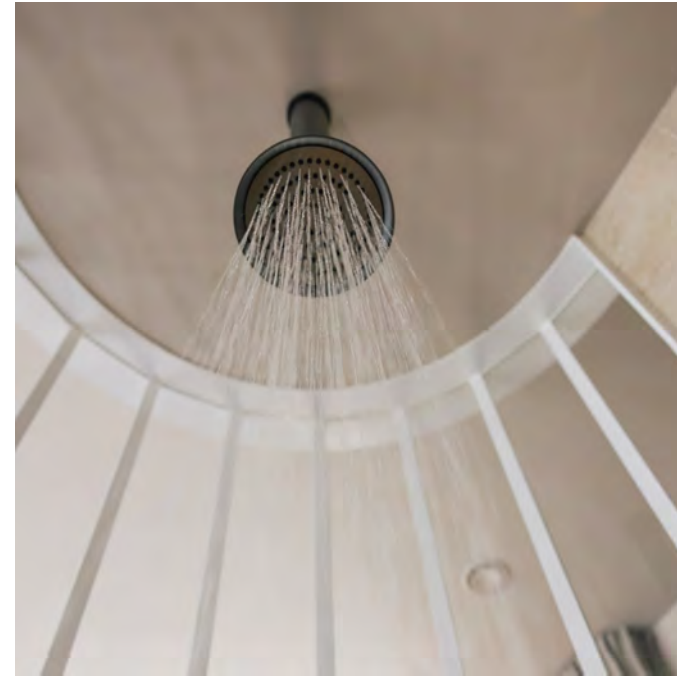

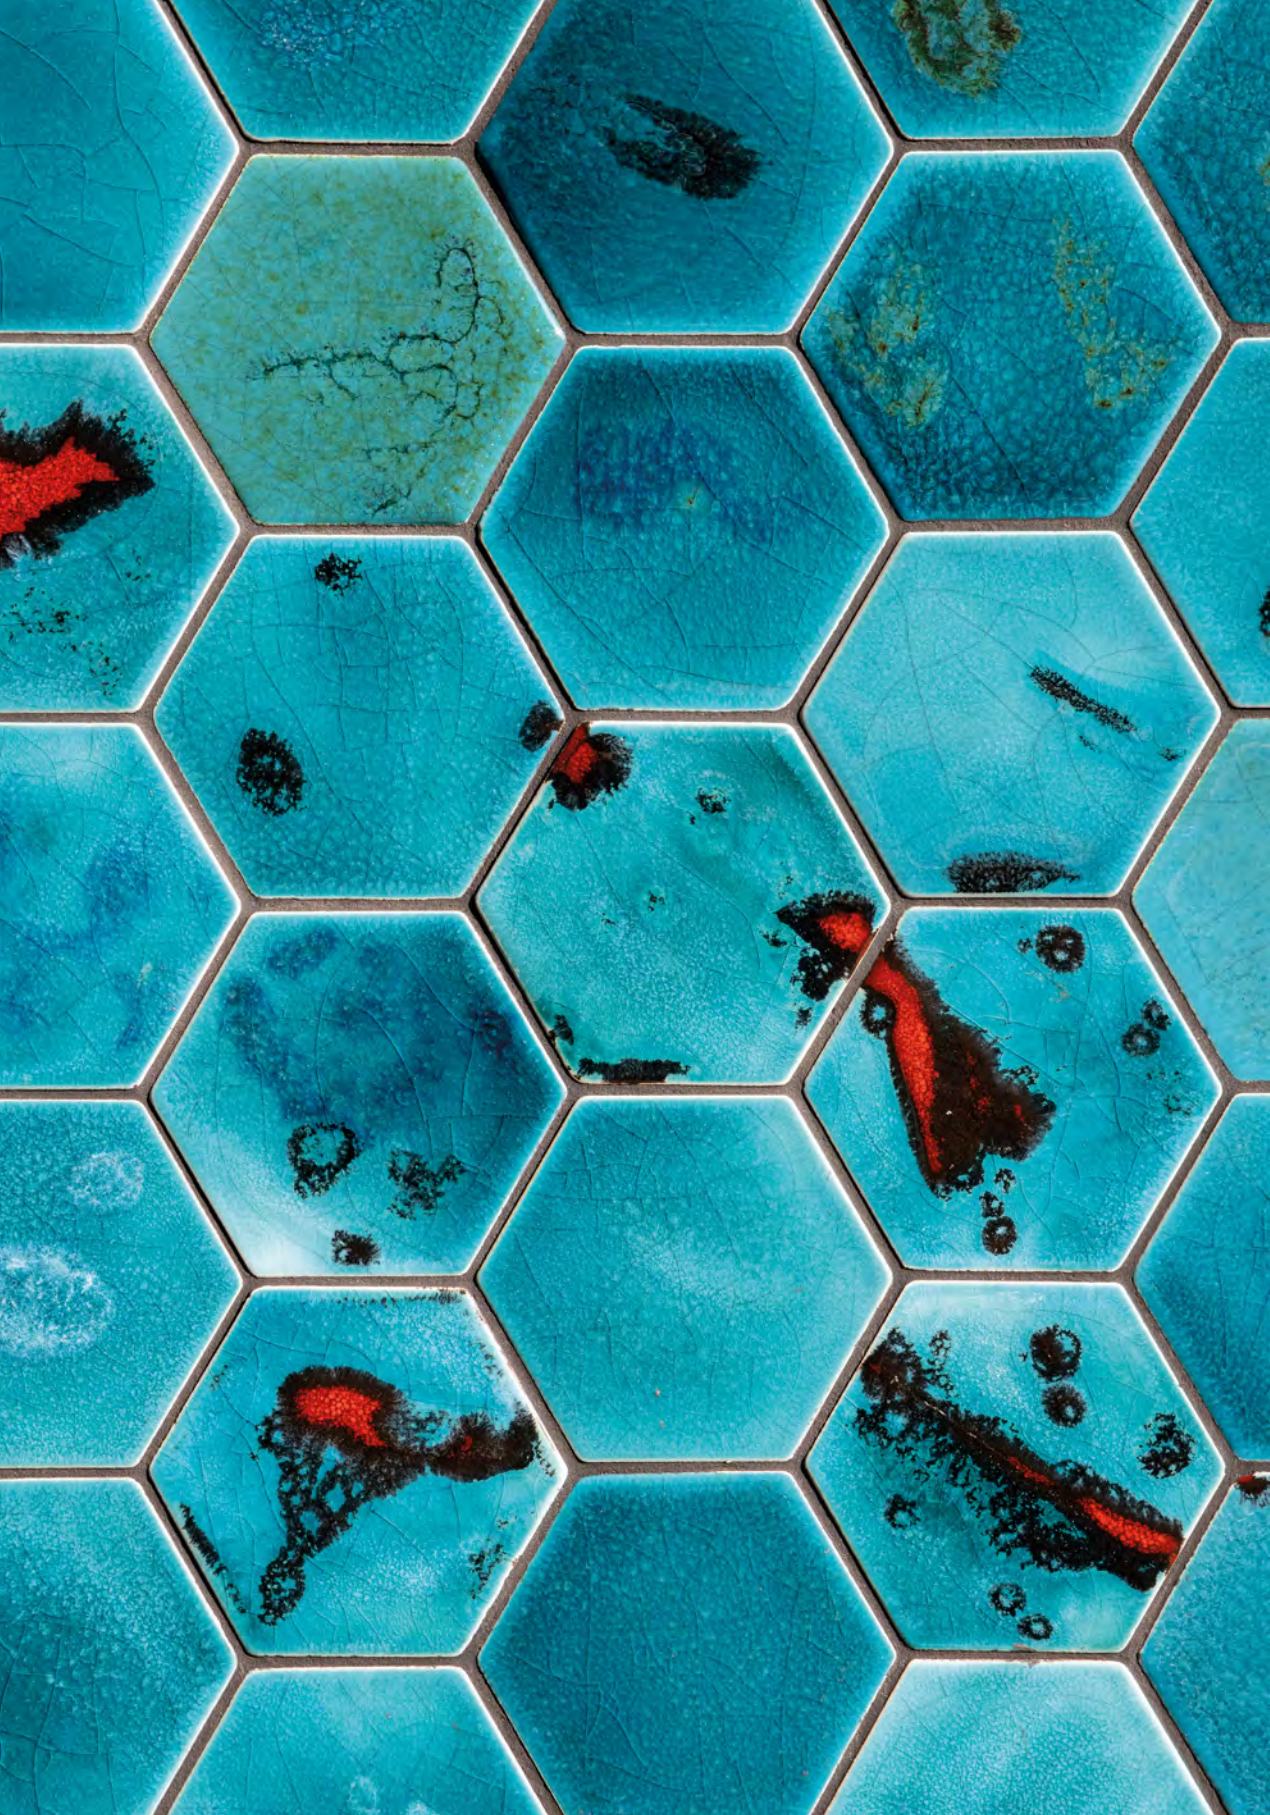

The exclusive Technogym Bench, beyond its functional use, serves as an artistic expression and a symbol of social responsibility. After being showcased at Milan Design Week, the creation of Osiris Hertman is auctioned off in collaboration with Sotheby's and sold on [technogym.com](https://www.technogym.com). All profits are donated to UNICEF.

MOON SURFACE Technogym Bench. The artist meticulously crafted it by casting aluminum as a brittle biscuit plate, then spraying it with Ferrari car paint gold, and finally pouring eight layers of epoxy. Creating a fairytale moonscape that invites tactile exploration.

Osiris designing the cone series. Every aspect of design shape, pure shine of the stainless steel metal, is finished by the best local artisans

The cone collection is amazingly fitting with your architecture

The cone wall bath combination set with the dubai bath from JEE-O by DADO collection

The studio is working with local artisans, creating metal lamp in Java, big plateau of chamotte clay in Belgium, design hotel mister Highland, Amsterdam. Working with JEE-O, basin outside matt gold edition.

THE STUDIO

In the last 25 years Osiris Hertman Studio has built up a close and passionate network of designer, manufacturer and craftsmen that all share **Osiris' love for high quality**, unique designs. Because of the diversity of the projects the team of Osiris Hertman Studio currently consists of architects, interior designers and product designers. The high level of detailing also requires exceptional manufacturers and craftsmen that were carefully selected and are worked closely with for numerous years.

Osiris Hertman Studio designs private residences for clients from Holland to Curaçao and Monaco to Indonesia but also undertakes corporate and commercial projects such as showrooms, restaurants, hotels and recently even a wellness resort. The furniture and objects specially created for a project, not rarely attracts large international brands that result in a fruitful cooperation.

JEE-O and Osiris Hertman have the same DNA in many ways. Always looking for the best quality of material that can be produced, repairable is a super important goal. International thinking and worldview, in a world where timeless design is necessary to avoid falling into the problem of the throwaway society. Trendsetting and Innovative are key words.

with details**

TRUE CRAFTSMANSHIP

These times call for making things that have a lifelong shelf life. A quality in material that means disposal is never an option. Finishing a final detail by hand is indicative of all Osiris Hertman designs and a daily DNA for JEE-O. Stainless Steel is a very strong material, which is perfect for building a quality product that always works well and requires little maintenance. Hertman's strength is to explore the border area of possible versus not possible, to design and create with design in that border area.

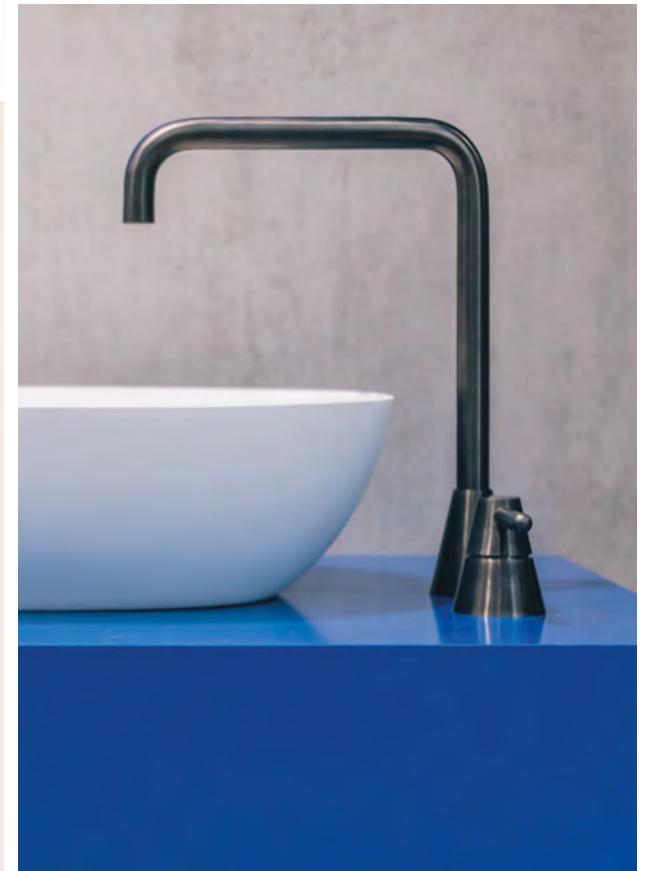

CURAÇAO

Find peace of mind by the clear Caribbean Sea in Blue Bay, Osiris Hertman realized The Shore, The Ridge and Brass Boer the amazing restaurant, a place where fun dining takes center space, a concept at Jonnie & Thérèse Boer, well known by their 3 Michelin star restaurant De Librije. Only the best materials close to nature are used by Hertman, quartzite stone for the top of the bar, handmade tiles from Portugal and Petrified wood from Indonesia.
