## Product specifications

The Silentia mobile bed end screen is an extremely versatile five-fold mobile privacy screen. It provides optimal privacy at the end of the bed or whenever a patient needs mobile privacy. The wheelbase takes up minimal floor space, while providing maximum stability. The bed end screen is available in a variety of lengths, heights, and colors.

### Material

The screens are made of high-pressure laminate or polycarbonate panels and aluminum hinges and frames. The wheelbase consists of a rigid steel base with a plastic cover made of PC/ABS. The wheels are made of polyamide with polyurethane tires. The connections are made of polyamide reinforced with fiberglass. The lightweight construction is user-friendly and optimizes stability and safety.

### Dimensions & sizes

#### Height

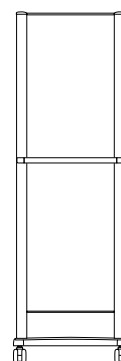

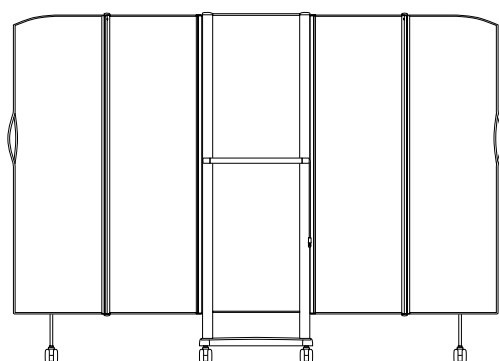

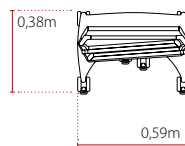

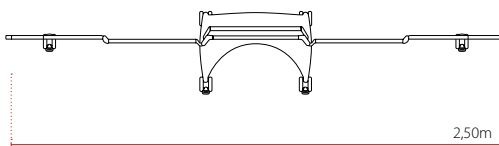

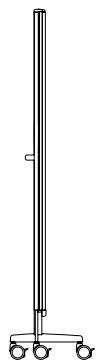

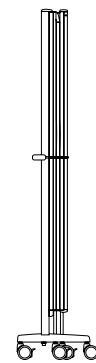

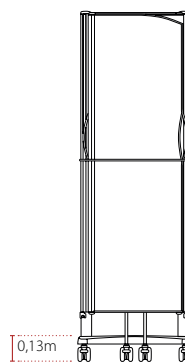

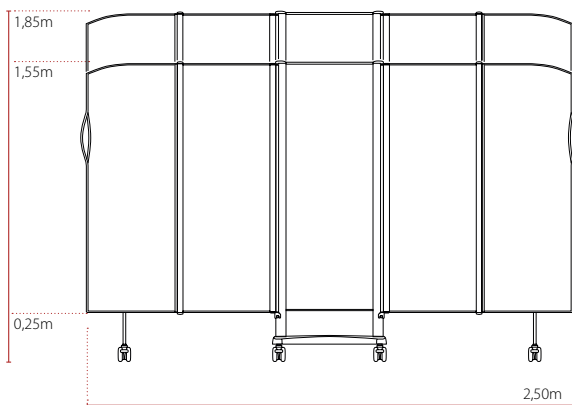

1,55m & 1,85m

#### Length

2,50m

Height	1,55
	33 kg
	1,85
	38,6 kg

## Product specifications

### Care & maintenance

**EasyClean™** All products meet strict hygiene requirements and all surfaces are accessible for cleaning. The screens have hard and smooth surfaces that do not trap dust and withstand the majority of detergents that are used in healthcare. The wheels can easily be removed and cleaned in a dishwasher.

### Handling/Use

The bed end screen is stable and easy to move, equipped with a single touch-point handle. For easy mobility, the wings are folded together and secured with an elastic cord. The screen can be easily operated from both sides. The two wings can be used as folding doors for entering and exiting patient areas. Due to its stable wheelbase, the brakes do not need to be locked at any time.

### Sustainability

Silentia focuses on developing long-lasting products that minimize our environmental impact. Since 1990, Silentia has been committed to improving patient care around the world with a safe, hygienic, and resource-efficient privacy system. [LINK TO SUSTAINABILITY PAGE](#)

### Recycling & disassembly

The screen is recyclable and all parts can be completely separated and individually delivered to a suitable recycling facility.

### Certificates / Listing

EN ISO 9001:2015

EN ISO 14001:2015

Listed as interior solution for the  
["WORLD'S GREENEST HOSPITAL"](#)
