CAS Rooms

CAS Rooms – the modular System

Design – Change – Connect – Feel comfortable

Design

Design open spaces. CAS Rooms provide countless configurations for open-plan office areas. They combine workspaces and a feel-good atmosphere in a varied and variable way.

Change

Stay flexible. Thanks to their modular structure CAS Rooms adapt to your requirements. A quick change to adjust to new situations is always possible.

Connect

Establish your connections. Whether for spontaneous encounters, exchange of ideas or lounge feeling. YOU can design your individual room solutions with CAS Rooms.

Feel comfortable

Increase the well-being and performance of your employees. CAS Rooms optimise room acoustics for confidential talks and focused working.

Diverse Possibilities

Acoustic. Modular. Diverse. Changeable.

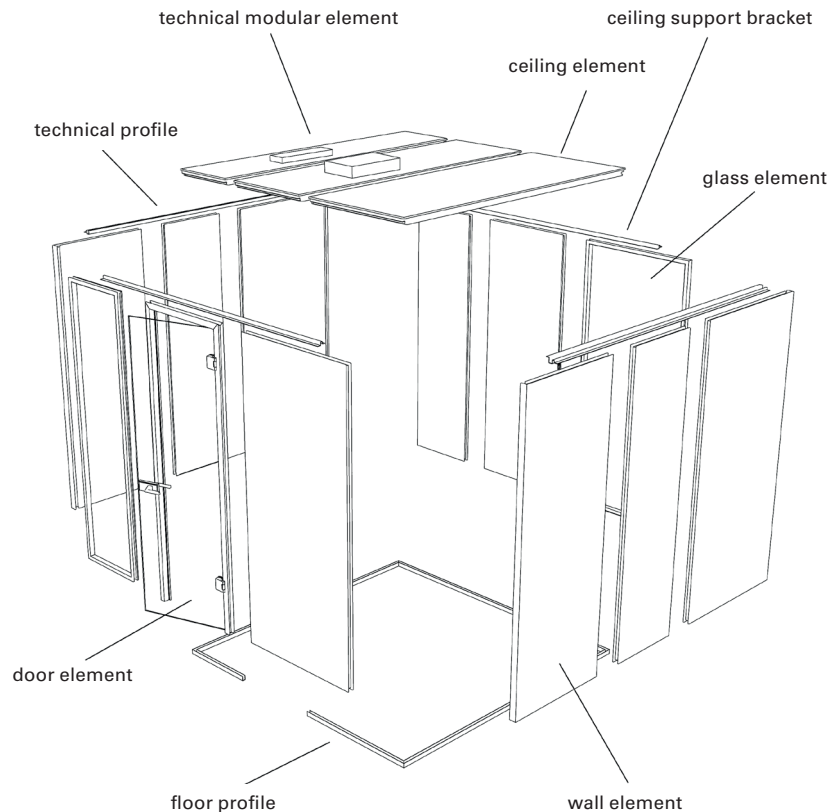

CAS Rooms MODULAR

CAS Rooms turn office areas into creative spaces. The textile room system provides versatile modules for almost all situations of communication as well as for being and working together: from acoustically optimised

workstations to complete rooms for undisturbed conversations, focused working or relaxed exchange.

Textile Surfaces combine the acoustically effective product structure with a feel-good ambience.

There are no limits to the imagination during the design phase and the design can be rearranged at any time later on to accommodate changes and new requirements.

Individual or room to go?

For the extra flow and more comfort

The new world of workplaces shapes the office environment – Co-Creations, project teams, agile methodes. To make it even more flexible for teams and individuals, we have developed **CAS Rooms FLOW**. Trusses in a flexible grid with a finely designed lighting concept and the option of integrating curtains create space for innovation without isolating. For the extra FLOW at the project work.

CAS Rooms SET is a completely free-standing room system. It offers four different standardised room sizes – in different variants. Acoustically highly effective, CAS Rooms promotes focused work and communication in teams. With the use of textile surfaces, the flexible room-in-room system enables numerous options for individualisation and an atmosphere that promotes corporate identity.

The textile room system transform office space into creative rooms

For the visual relaxation programme in the office. Because Colour isn't just colourful. Coloured textiles are one of the most important aspects of Well-Being.

Small detail – big effect.

With 12 different upholstery collections and over 450 colours, CAS Rooms offers a wide range of design options.

The scope for design is complemented by other surfaces from the laminate range. This diversity offers a high degree of creative freedom and at the same time supports themes such as corporate identity.

Design and Colour
